

Secondhand Marketplace

A Secondhand Marketplace mobile app

TEAM: Alex Hetherington, Euan Chan, Freddie de Bruyn, Jen Lee
CLIENT: Marius Jurt

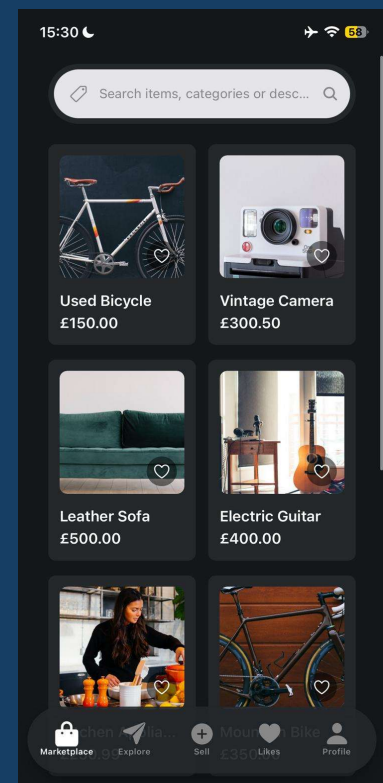

CLIENT BRIEF

We were tasked with building a secondhand marketplace app that focuses on engagement and user-friendliness through gamification that makes browsing items feel playful. The app should let buyers discover items they'll love, give sellers a trusted space to build a reputation, and make the whole experience of buying and selling actually enjoyable.

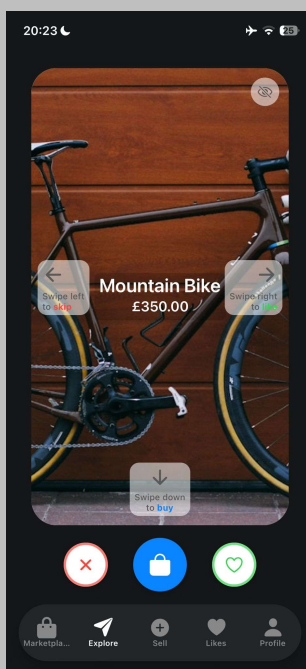

Design Achievements

- Intuitive and direct interface
- Gamified enjoyable experience
- Butterfly interaction
